

Direct Export from Databases like Web of Science

1. Direct export from Web of Science

Step 1 – Perform a search in the WoS

- Got the Web of Science: <http://www.isiknowledge.com/WOS>
- Perform your search
- Select the needed references

WEB OF KNOWLEDGE™

Step 2 Export to EndNote program

- Got to “Send to EndNote”

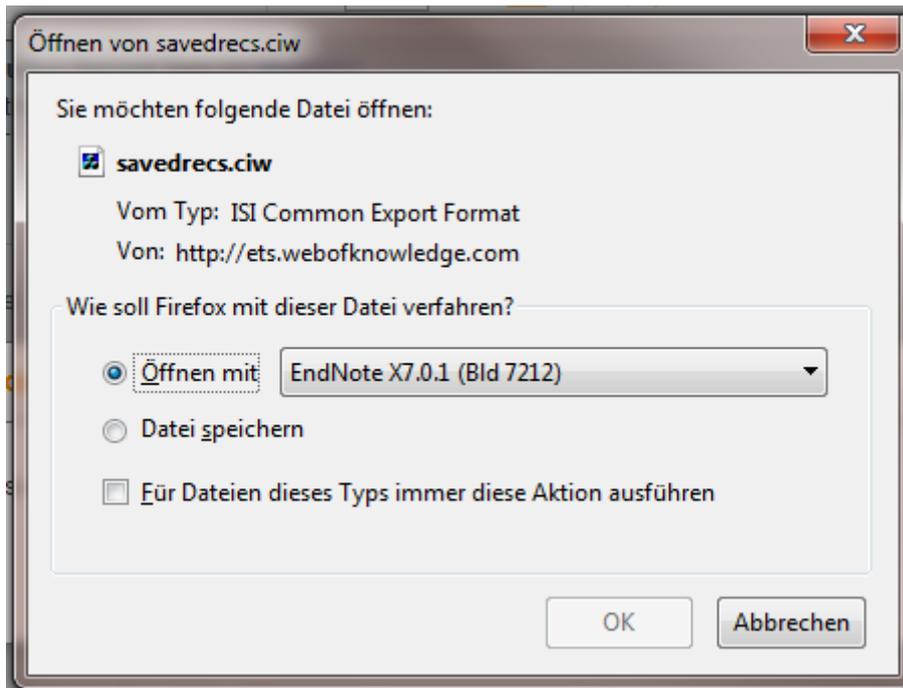

The screenshot shows the 'Send to' dropdown menu in the Web of Science interface. The menu is open, showing the following options: 'my.endnote.com', 'my.endnote.com', 'EndNote', 'ResearcherID - I Wrote These Publications', and 'Other File Formats'. The 'Send to' field is set to 'my.endnote.com'. Below the menu, the details of a selected record are visible: '1. Title: Principle of Locality and Analysis of Radio Occultation', 'Author(s): Pavelyev, Alexander G.; Zhang, Keifei; Liou, Yuei-An; et al.', 'Source: IEEE TRANSACTIONS ON GEOSCIENCE AND REMOTE SENSING, Vol. 51, No. 10, Part 1, pp. 6119-6128, 2013', 'Published: JUN 2013', 'Times Cited: 0 (from Web of Science)', and 'GeoForschungsZentrum Potsdam [View abstract]'.

- Select the number of records you want to export
- Select the record content, “Full Record” for example

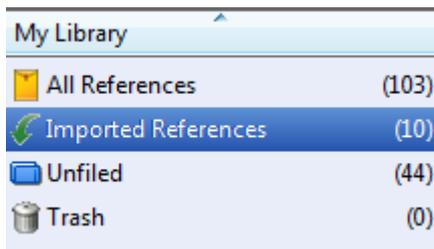

The screenshot shows the 'Send to EndNote' dialog box. The 'Number of Records' section has 'All records on page' selected. The 'Record Content' dropdown menu is open, showing the following options: 'Author, Title, Source', 'Author, Title, Source', 'Author, Title, Source, Abstract', 'Full Record', and 'Full Record and Cited References'. The 'Full Record' option is highlighted. Below the dialog box, the details of a selected record are visible: '3. Title: Quantification of structural uncertainty in climate data records from GPS radio occultation', 'Author(s): ...', 'Source: ...', 'Published: ...', and 'Times Cited: ...'.

- Click on send
- Wait for the saving dialog ¹
- Choose “Open with” and select the EndNote program

¹ If not, please check your browser settings.

The exported references will appear in the temporary group “Imported References” in the left group pane.

2. Direct export from other database

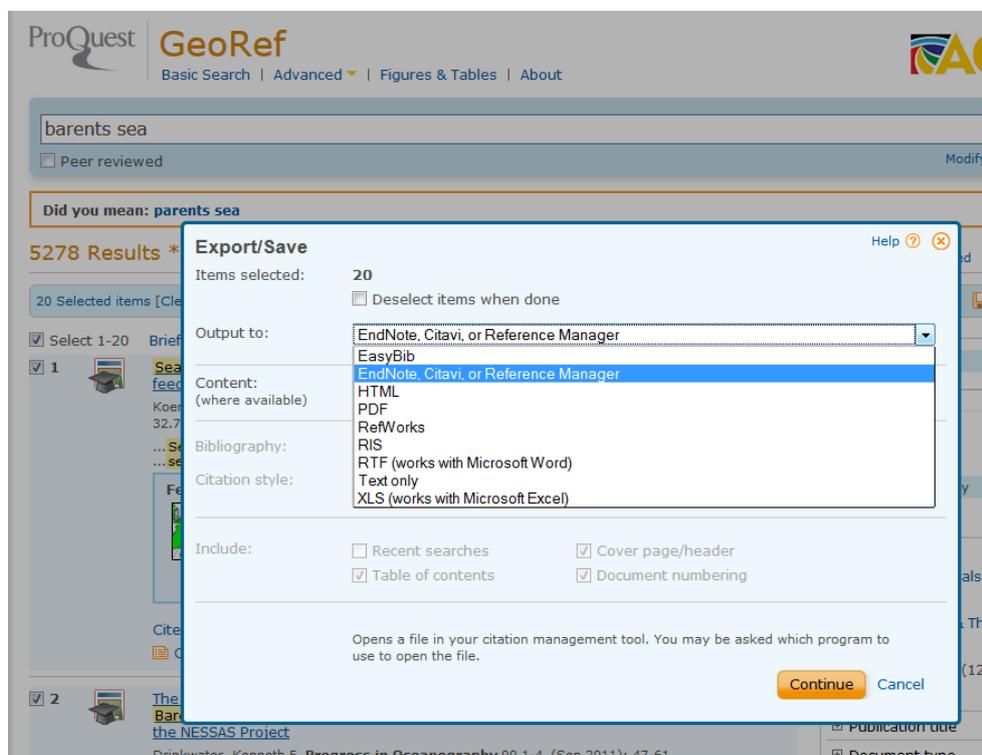

Many information providers have a direct export option that allows you to send copies of references directly to an EndNote library. The direct export process automatically selects an EndNote import filter to map bibliographic information into the appropriate EndNote fields. All you need to do is select the EndNote library into which the data should be imported.

- Go to the database in your Web browser
- Perform your search
- Click the Search button
- Select the needed results,
- And then select Export/Citation Manager from the menu
- Click Create File to export your selected records directly to EndNote.

The selected records will appear in a temporary group called Imported References in the Groups panel. Select the references and move them to a group within your open library.

Example GeoRef

- Go to GeoRef: <http://search.proquest.com/georef?accountid=15969>
- Perform your search
- Select the needed references
- Click on to Export/Save
- Choose “Output to EndNote...”

- Wait for the ProQuest dialogue “Request Complete”
- Open the file with EndNote program

The screenshot shows a web browser window displaying the ProQuest GeoRef 'Request complete' page. The page includes the ProQuest and GeoRef logos, the AGI (American Geosciences Institute) logo, and instructions: 'Your file should download automatically in a moment. Close this page after your download completes.' A 'Contact Us' link and copyright information are also visible. Overlaid on the page is a Firefox dialog box titled 'Öffnen von ProQuestDocuments-2013-10-25.RIS'. The dialog box asks 'Sie möchten folgende Datei öffnen:' and shows the file name 'ProQuestDocuments-2013-10-25.RIS' with details: 'Vom Typ: RIS Formatted File' and 'Von: http://search.proquest.com'. It then asks 'Wie soll Firefox mit dieser Datei verfahren?' and offers three options: 'Öffnen mit' (selected) with a dropdown menu showing 'EndNote X7.0.1 (Bld 7212)', 'Datei speichern', and 'Für Dateien dieses Typs immer diese Aktion ausführen'. 'OK' and 'Abbrechen' buttons are at the bottom.

The exported references appear in the temporary group “Imported References”
